

# Digestion SUPPORT

Bacterial strains in this formulation support digestive health and the breakdown of food, especially gluten and casein. The added calcium is essential for the digestive process. Stimulates digestive enzymes, improves gastric acid secretion, and the peristaltic movement of the bowel.

## Specific target group

For individuals seeking to support a healthy gut environment and optimal digestion.

## Strain selection

The strains have been specifically selected based on our latest insights from both our own in vitro work performed in our state-of-the-art facilities and our extensive scientific literature analysis.

- Improve the intestinal barrier function and integrity.
- Assist in the breakdown of gluten and casein thanks to the enzyme DPP-IV.
- Inhibit pathogens such as Salmonella & Shigella.

## Functional Ingredients

15% of the Nutritional value reference according to EU 1169/2021.

## Strains

- *Bifidobacterium lactis* W53
- *Lactobacillus plantarum* W21
- *Lactobacillus rhamnosus* WGG
- *Lactococcus lactis* W19

With calcium for  
the maintenance  
of healthy digestion
