

# Immunity SUPPORT

Bacterial strains in this formulation stimulate various immune cells and therefore boost and support the immune system on different levels. Added vitamin D is essential for optimal immunity.

## Specific target group

For individuals seeking to strengthen their immunity; designed to address the increasing need for immune support in modern lifestyles, considering factors such as stress, poor dietary choices, and environmental challenges.

## Strain selection

The strains have been specifically selected based on our latest insights from both our own in vitro work performed in our state-of-the-art facilities and our extensive scientific literature analysis.

- Stimulate macrophages, important to fight pathogens.
- Stimulate Th1 cytokines, necessary to fight infections.
- Stimulate dendritic cells, important for the prevention infections.
- Stimulate vaccination efficiency by increasing antibodies.

## Functional Ingredients

15% of the Nutritional value reference according to EU 1169/2021.

## Strains

- *Bifidobacterium lactis* W51
- *Lactobacillus acidophilus* W37
- *Lactobacillus plantarum* W1
- *Lactococcus lactis* W58

With vitamin D & Selenium for the immune system
